Section 5 – DISCLAIMERS & DISCLOSURES

By using this site or any of the products, services, and information from this site that you have carefully read through & fully acknowledged the following disclaimers & disclosures below in this section.

Risk Disclaimer

Trading is risky & most day traders lose money. All content is to be considered hypothetical, selected after the fact, in order to demonstrate our Services and should not be construed as financial advice. Decisions to buy, sell, hold or trade in securities, commodities and other investments involve risk and are best made based on the advice of qualified financial professionals. Past performance does not guarantee future results.

The risk of loss in trading can be substantial. You should therefore carefully consider whether such trading is suitable for you in light of your financial condition.

Hypothetical And Simulated Performance Disclaimer

Hypothetical or Simulated performance results have certain limitations, unlike an actual performance record, simulated results do not represent actual trading. Also, since the trades have not been executed, the results may have under-or-over compensated for the impact, if any, of certain market factors, such as lack of liquidity. Simulated trading programs in general are also subject to the fact that they are designed with the benefit of hindsight. No representation is being made that any account will or is likely to achieve profit or losses similar to those shown.

Testimonials Disclaimer

Testimonials appearing on this website may not be representative of other clients or customers and is not a guarantee of future performance or success. Any trading results depicted in testimonials are not verified and we have no basis for believing that individual experiences depicted are typical considering that results will vary given many factors such as skill, risk management, experience, and the fact that trading itself is a very high-risk activity where it is easy to lose money.

As a provider of technical analysis tools for charting platforms, we do not have access to the personal trading accounts or brokerage statements of our customers. As a result, we have no reason to believe

our customers perform better or worse than traders as a whole based on any content or tool we provide.
